

Ron Brown: January 13, 2011

Ron Brown, a training and supervising analyst at the Canadian Psychoanalytic Society, Quebec English Branch, was our guest speaker on January 13th 2011. Dr. Brown spoke before a combined group of VPSG members and seminar participants from our 2010-11 seminar series. He presented a very thought-provoking and entertaining paper on the case of "Little Hans". Using historical information only recently available, Dr. Brown provided a reanalysis of the case. He demonstrated that an understanding of the intertwined psychology of the cast of characters surrounding Hans allows for additional perspectives on the Oedipal situation in which Hans was immersed.

We thank Dr. Brown for a most interesting presentation and hope that he will join us again to continue the dialogue begun on this night.
